***NOTIFACT CORPORATION SIGNS AGREEMENT WITH
LENNOX INDUSTRIES***

*Notifact WMS Transceivers to be Equipped with "Plug and Play" Capabilities
for Easy Connection to Lennox Rooftop Units*

Fairfield, New Jersey – The Notifact Corporation today announced an agreement with Lennox International Inc. (NYSE: LII) to provide Notifact-ready "plug and play" communications to select Lennox rooftop models. The Notifact Wireless Monitoring System (WMS) will provide direct plug-in communications capabilities to the Integrated Modular Control Board, which is standard on L Series 3 – 30 ton rooftop packaged units. Notifact WMS provides real-time monitoring of HVAC/R equipment without costly building automation, dedicated phone lines and central monitoring centers by applying Internet server and wireless technologies.

"We are very excited to make this agreement with Lennox, a company with a long tradition of quality and innovation," Kevin Duffy, Vice President, Sales and Marketing, Notifact, said. "By applying the Notifact wireless monitoring system,

Lennox can now offer customers a rooftop unit that will immediately notify them of an equipment alarm... all without costly building automation systems, modems and phone lines."

"Plug and play" connections will enable every alarm point configured on the Lennox unit to be communicated wirelessly, direct to service contractors and facility managers via pagers, cellular phones, faxes and e-mail. The *Notifact* alert message will provide location, equipment identification, and the specific equipment alarm code causing the disruption.

Using this cutting edge technology, service contractors will respond with the most qualified personnel, prepared with the proper parts and tools, greatly reducing equipment down time and costly business disruptions.

The agreement will allow Lennox dealers and any servicing contractor to differentiate their services by providing the latest in digital and Internet equipment monitoring. Instant alert notification will allow contractors to lock-in service calls, increase customer service and retention and improve management of day-to-day business operations.

In addition to reducing down time and business disruptions, facility managers and building owners can monitor contractor and equipment performance, coordinate notification protocols, reduce equipment life cycle costs and manage service and maintenance costs through the *Notifact* web site.

Selling heating, ventilation, air conditioning, and refrigeration equipment in over 70 countries, Lennox International Inc. is a global leader in climate control solutions. Lennox operates in five key business segments: North American residential, North American retail, worldwide commercial refrigeration, worldwide commercial air conditioning, and worldwide heat transfer. Lennox International stock is traded on the New York Stock Exchange under the symbol "LII." Additional information is available at: www.lennoxinternational.com or by contacting Karen O'Shea, vice president, communications and public relations, at 972-497-5172.

Presently available throughout North America, the *Notifact* WMS is a highly cost-effective alternative to traditional monitoring systems, which use dedicated phone lines and manned call centers. *Notifact* transmits regular diagnostic information for maximizing system efficiency, as well as providing early warning for potential system failures. Wireless technology utilizing pagers, cellular phones and the internet allows for instant notification of any irregularities, which results in more cost-effective and timely system repairs and fewer business interruptions.
