

The future of HVAC/R monitoring is calling...

Notifact™

Midnight phone call from home?
No. It's Rooftop Unit #34 at
Commerce Mall, reporting low refrigerant pressure.

Notifact[™]

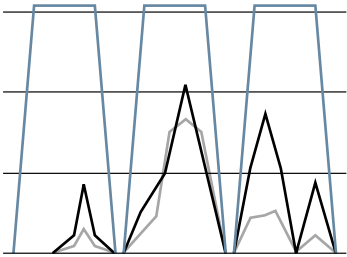

Relax ... It's Notifact™—the revolutionary wireless monitoring system for HVAC/R equipment.

Introducing an innovative approach to monitoring the operations and performance of your HVAC/R equipment. It's Notifact, a breakthrough in system monitoring that combines the cost-effectiveness of wireless remote technology with the power of the Internet. Now, your equipment can communicate directly with multiple users through a variety of media, including faxes, cell phones, pagers, even e-mail.

Notifact couldn't be easier or more affordable. No more costly phone lines. No more expensive central control systems or monitoring center. With Notifact, every piece of equipment has its own monitoring unit that allows you to stay in touch with the operations in all of your facilities.

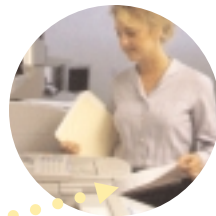

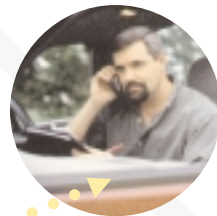

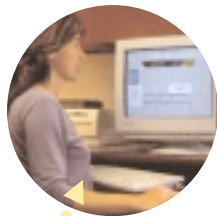

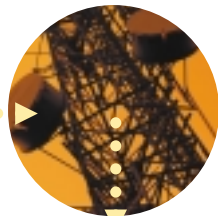

You can even set alarm conditions other than those that are standard. So when your HVAC/R equipment is experiencing an operational problem, Notifact will alert you—and any number of people you choose—in minutes. It'll even tell you the exact problem, make and model of the unit so you can dispatch the best-qualified technician to the job site.

Notifact delivers around the clock. Every night, each unit checks in with a "heartbeat" containing critical data, such as fan and compressor run times and cycles. This gives you the personal contact you need to be assured that the monitor is operating and to analyze the performance of your equipment, as required.

Put the power of Notifact to work for you!

- Reliable and cost-efficient.
- The flexibility to simultaneously notify multiple recipients of equipment problems.
- Instantaneous messaging so a problem can be attended to before others even realize there is one.
- Problem-specific alarm messages may be transmitted allowing dispatch of the best-qualified technician.
- Downtime is minimized by maintaining equipment and allowing small problems to be fixed before they become major repairs.
- A complete record of each unit's operating history is available at our secure website.
- Special service button records and transmits the moment a technician arrives to confirm response time.
- Notifact works with all manufacturers' equipment.

Notifact™

Join the Notifact revolution!

Potential savings loom large—put the cost-effectiveness of wireless remote technology and the power of the Internet to work for your business. Financing options and customizable solutions make it feasible for just about any organization to implement this breakthrough technology. There's a revolution in the air. And you can join it with the simple push of a button. Call 973-227-2900, fax 973-227-4202 or e-mail us from the "Contact us" section at www.notifact.com for more information or to meet with one of our sales representatives today. Or get a taste of the real thing—log on to www.notifact.com for a live, online demonstration.

ure of
HVAC/R
is calling...

And it's not using a phone line.

It's all on the website!

Everything you need to manage your equipment is as handy as our secure website. Here are just a few sample screens:

Device Messages let you control who gets the message and how it's delivered.

These are devices already installed - select one to see more detail or modify settings. 'Copy' installs an additional device with the same location and message delivery details. 'Remove' removes the device and its messages. 'Replace' allows a new device to be swapped into this one's location.

Device ID	Location	Address	City	Remove Device	Copy Device	Replace Device
19	Carrollville Center (107)	Lake Shore Drive	Chicago	Remove	Copy	Replace
